

LUXOR®/ALUFIN® KPS-OP

Coldfoil

Improved formulation for use in UV sheet fed offset printing

The advantages at a glance

- suitable for all kinds of designs, from fine to broad
- optimized halftone design
- consistently easy release
- good adhesion both to conventional and UV curing cold foil adhesives
- very good gloss level
- good overprintability both with conventional (oxidative) drying and UV curing inks and coatings

Substrates

- papers and cardboards with smooth surfaces
(art papers, laminated and coated stock)

Shades
