

## DIGITAL METAL®

Combines digital printing with coating- and metal-transfer process to create metallized surfaces, even for small runs or individual prints.

Easy and efficient!

## DIGITAL METAL® Silver

Almost all color shades can be produced by overprinting with ink and toner.

## DIGITAL DIFFRACTION®

Diffraction surfaces are an iridescent eye-catcher from any angle. An effective and on-trend alternative or complement to the usual colours.

## DIGITAL METAL® Gold

The all-time classic enhancer gold is also available for DIGITAL METAL®

## DIGITAL HOLO®

DIGITAL HOLO® are holographic design elements with images that change as their position changes. They strengthen brand identity by demonstrating the authenticity
