

GELTEX

Geltex FSC® is made of pulp-coloured, long fiber cellulose. Available plain (LS) or embossed.

Geltex FSC® is excellent for book-covers, endleaves, packaging, bags, envelopes etc.

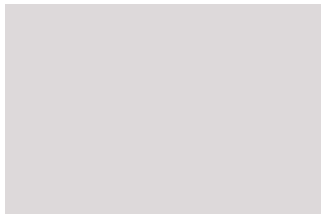

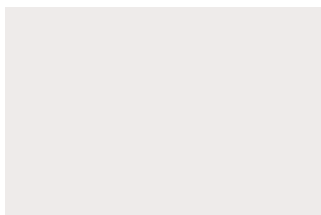

*For exact colours see a physical sample or our GELTEX SWATCH BOOK

Graphic materials

Conscious choice of material gives the right feeling and reinforces the message you want to convey with your product. Stylish, classic, trendy, colourful, advanced - with us you will find a wide selection of paper, cardboard, leather and cloth in different embossings and colours. In addition, accessories such as headbands, readbands, elastics and gauze etc.

It may be a jungle, we know, but we will guide you on our website. Do not hesitate to contact us - we are happy to help!

We stock many of the qualities you will see in different weights and colours. Both the company and most of our graphic materials are FSC certified.

In 1917 the greatness of Swedish film began and Claude J. Zethraeus showed how to make a visual impression with decorative cover material. His give was leather and gold leaf that enhanced the experience of handmade books.

Our family company has its roots in Claudes ideas and today we have provided the world with decorative cover materials for over a century.

In the rearview mirror we see an expansive 50's with Yngve Zethraeus Sr. as CEO. That was when editions increased and we added selected cloths and papers in different textures and marbling. Then the 60's came when our hot stamping technology made its entrance. At the same time as the gold leaf had to give way to a whole new flora of paper and hot stamping foils.

While man landed on the moon, Yngve Zethraeus Jr. took over the business and gave the offering the breadth and strength we have today.

Since 2009, Ann-Charlotte Zethraeus Höglund has been navigating us into the future. The goal of the trip is to continue to explore new graphic materials, foils and machines for surface decoration and labeling.
