

COMPA II + APL

The perfect addition to our
tried and tested all-rounder.

Compa II + APL – Modular composition for high versatility of use.

With Compa II, we set a milestone in the matters of versatility and ease of use. We have now expanded this system to include the APL applicator unit for stamping, blowing and rolling labels on. For our customers, that means: the desired label is applied to your product directly after printing. Labelling really is that simple.

TECHNICAL DATA

	Stamp on	Blow on	Roll on
Label width	25 – 176 mm	25 – 176 mm	25 – 176 mm
Label height	25 – 200 mm	25 – 100 mm	80 – 200 mm
Cylinder stroke	300 mm	300 mm	300 mm
Pad stroke below printer	180 mm	180 mm	180 mm
Compressed air pressure	5 bar	5 bar	5 bar
Product surface	flat	flat	flat
Product height variable	●	–	●
Product height fixed	●	●	●
Product fixed	●	●	–
Product linear movement	–	●	●

Tamp pad

During the print and apply cycle the product remain fixed. The universal tamp is covered by a foil. According to the size of the label the holes can be pierced. The tamp pads are customized to the dimensions of the label sizes on request.

Blow pad

For non-applying pressure to sensitive products, the label can be blown onto the product with the supporting air jet stream. The print and apply cycle performs in a fixed position or in a linear movement of the product. The blow pad moves to a preadjusted position approx. 10 mm away from the product.

Roll-on pad

In the starting position the label is forwarded until touching the roller of the roll-on pad. At the labelling position the roller is pressed onto the product. Then the label is applied and rolled on by the movement of the products.
